

Unit 5 MCQs for Practice

#1. Question 1: What does ICT	stand for in the context of education?
□ A. International Communication Techniq	ues
☐ B. Information and Communication Tech	nologies
□ C. Interactive Classroom Tools	
□ D. Integrated Computing Training	
used to handle telecommunications, br	n and Communication Technologies, encompassing a wide range of technologies oadcast media, intelligent building management systems, audiovisual processing -based control and monitoring functions.
#2. Question 2: Which of the f	ollowing is a key advancement in educational technology?
□ A. Overreliance on textbooks	
B. Interactive whiteboards	
C. Single-user computer systems	
D. Traditional lecture methods	
	e a significant advancement in educational technology, allowing for dynamic and ge students more effectively than traditional whiteboards.
#3. Question 3: What is the education?	primary purpose of Learning Management Systems (LMS) in
A. To replace teachers	
B. To manage and deliver educational co	ontent
C. To conduct physical examinations	
D. To limit student access to resources	
	stems (LMS) are designed to manage, deliver, and track educational content and dadministrative processes in educational institutions.
#4. Question 4: Which technol	ogy is commonly used for virtual classrooms?
□ A. Radio broadcasting □	
B. Video conferencing tools like Zoom ar	nd Microsoft Teams
C. Printed handouts	
D. Overhead projectors	
Explanation: Video conferencing tools	s such as Zoom and Microsoft Teams are commonly used to facilitate virtual

© Ayurvite Wellness Pvt Ltd. All rights reserved. This PDF is for personal use only Unauthorized reproduction, distribution, or commercial use is strictly prohibited.

classrooms, enabling real-time interaction between teachers and students regardless of their physical locations.

WHERE CLASSICAL WISDOM MEETS INTELLIGENT LEARNING

#5. Question 5: What does the term "blended learning" refer to?
□ A. Learning that only occurs online
□ B. A combination of traditional face-to-face and online learning
C. Learning without any technological tools
D. Learning through physical textbooks only
Explanation: Blended learning combines traditional face-to-face classroom methods with online educational materials and activities, providing a flexible and integrated learning experience.
#6. Question 6: How have Massive Open Online Courses (MOOCs) impacted education?
A. By limiting access to education
B. By providing free or low-cost access to courses for a large number of students worldwide
C. By reducing the quality of education
D. By replacing all traditional universities
Explanation: MOOCs have significantly impacted education by offering free or low-cost courses to a vast number of learners globally, democratizing access to education and enabling lifelong learning opportunities.
#7. Question 7: What is augmented reality (AR) in educational technology?
A. A technology that replaces the physical world with a digital one
B. A technology that overlays digital information onto the real world
C. A form of virtual reality
D. A traditional teaching method
Explanation: Augmented reality (AR) enhances the real world by overlaying digital information such as images, sounds, and data onto it, providing interactive and immersive learning experiences.
#8. Question 8: Which of the following best describes adaptive learning technology?
□ A. Technology that remains the same regardless of student performance
□ B. Technology that adjusts the difficulty and content based on individual student performance
□ C. Technology that only provides pre-set learning paths
□ D. Technology that focuses solely on group learning
Explanation: Adaptive learning technology personalizes the learning experience by adjusting the difficulty and content in

real-time based on each student's performance, thereby catering to individual learning needs.

[©] Ayurvite Wellness Pvt Ltd. All rights reserved. This PDF is for personal use only. Unauthorized reproduction, distribution, or commercial use is strictly prohibited.

#9. Question 9: What is the role of Artificial Intelligence (AI) in modern educational technologies?

-	
□ A. To perform administrative tasks only	
B. To enhance personalized learning through intelligent tutoring systems and data analysis	
C. To replace human teachers entirely	
D. To limit student access to information	
Explanation: All in education enhances personalized learning by providing intelligent tutoring systems, analyzing studata to inform instructional strategies, and automating administrative tasks, thereby supporting both teaching	
learning processes.	
#10. Question 10: Which of the following is an example of a flipped classroom model?	
□ A. Students listen to lectures in class and do homework at home	
B. Students watch instructional videos at home and engage in interactive activities in class	
C. All learning occurs in a virtual environment	
D. Teachers deliver lectures without student interaction	
Explanation: In a flipped classroom model, students watch instructional videos or engage with learning materials at hand use classroom time for interactive activities, discussions, and practical applications, thereby enhancing engage and understanding.	
#11. Question 11: What is the main advantage of using gamification in education?	
□ A. It makes learning more competitive	
□ B. It increases student engagement and motivation through game-like elements	
□ C. It simplifies complex subjects	
D. It reduces the need for assessments	
Explanation: Gamification incorporates game-like elements such as points, badges, and leaderboards into educat activities, which can significantly increase student engagement and motivation by making learning more interactive enjoyable.	
#12. Question 12: How do e-books enhance the learning experience compared to tradition textbooks?	onal
A. They are always cheaper □	
B. They offer interactive features such as multimedia, hyperlinks, and search functions	
C. They are less accessible	
□ D. They replace the need for instructors	
Explanation: E-books enhance the learning experience by providing interactive features like multimedia con hyperlinks for easy navigation, and search functions, which make information more accessible and engaging for stude

#13. Question 13: What is the primary function of a virtual lab in education?
A. To replace all physical laboratories
B. To provide simulated experiments and interactive learning experiences
L. To limit student access to real-world data
D. To focus solely on theoretical knowledge
Explanation: Virtual labs offer simulated experiments and interactive learning experiences, allowing students to conduct experiments in a virtual environment, which is especially useful when access to physical labs is limited.
#14. Question 14: Which technology facilitates the creation and sharing of collaborative
documents in real-time?
□ A. Microsoft Word (offline version) □ B. Google Docs
C. Printed notebooks
D. PDF readers
Explanation: Google Docs allows multiple users to create, edit, and share documents collaboratively in real-time, enhancing teamwork and collaborative learning among students.
#15. Question 15: What is the benefit of using cloud-based storage in educational settings?
A. It limits access to educational resources
B. It provides scalable and accessible storage solutions for educational materials
C. It requires high local storage capacity
D. It restricts collaboration
Explanation: Cloud-based storage offers scalable and accessible storage solutions, allowing students and educators to store, access, and share educational materials from anywhere with an internet connection, thereby enhancing flexibility and collaboration.
#16. Question 16: How do Massive Open Online Courses (MOOCs) typically deliver content to
students?
A. Through in-person lectures only
\square B. Through online platforms with video lectures, readings, and interactive forums
□ C. Through mailed printed materials
□ D. Through one-on-one tutoring

Explanation: MOOCs deliver content through online platforms that include video lectures, digital readings, interactive forums, quizzes, and sometimes peer-reviewed assignments, enabling a flexible and scalable learning environment.

[©] Ayurvite Wellness Pvt Ltd. All rights reserved. This PDF is for personal use only. Unauthorized reproduction, distribution, or commercial use is strictly prohibited.

#17. Question 17: What is the role of Learning Analytics in educational technology?
A To replace traditional tooching methods
A. To replace traditional teaching methods
B. To collect and analyze data on student learning to inform instructional decisions \Box
C. To limit student access to information
D. To focus solely on administrative tasks
Explanation: Learning Analytics involves the collection and analysis of data related to student learning behaviors and performance, which educators can use to make informed instructional decisions and improve educational outcomes.
#18. Question 18: Which technology is essential for supporting synchronous online learning?
A. Asynchronous discussion boards
B. Video conferencing tools like Zoom and Microsoft Teams
C. Email
D. Offline assignments
Explanation: Video conferencing tools like Zoom and Microsoft Teams are essential for supporting synchronous online learning, enabling real-time interaction between teachers and students through live video and audio communication.
#19. Question 19: What is the primary advantage of using Augmented Reality (AR) in
education?
□ A. It replaces physical classrooms
B. It enhances real-world learning experiences by overlaying digital information
C. It makes learning less interactive
□ D. It focuses solely on virtual environments
Explanation: Augmented Reality (AR) enhances real-world learning experiences by overlaying digital information such as images, sounds, and data onto the physical environment, making learning more interactive and immersive.
#20. Question 20: How does Artificial Intelligence (AI) support personalized learning in
education?
A Dy delivering the same content to all students
A. By delivering the same content to all students
B. By adapting learning materials and pacing based on individual student performance and preferences \Box
C. By replacing human instructors □
D. By limiting access to diverse learning resources

Explanation: Al supports personalized learning by adapting educational content and pacing according to each student's performance, learning style, and preferences, thereby providing a tailored learning experience that meets individual needs.

[©] Ayurvite Wellness Pvt Ltd. All rights reserved. This PDF is for personal use only. Unauthorized reproduction, distribution, or commercial use is strictly prohibited.

#21. Question 21: What is the function of a Learning Management System (LMS) in higher education?

education?
□ A. To conduct physical examinations
B. To manage, deliver, and track educational courses and training programs
□ C. To replace all classroom interactions
D. To limit access to course materials
Explanation: A Learning Management System (LMS) manages, delivers, and tracks educational courses and trainin programs, providing a centralized platform for course content, assessments, communication, and performance monitoring
#22. Question 22: Which technology is primarily used for creating interactive an multimedia-rich educational content?
A. Word processors □
B. Authoring tools like Adobe Captivate and Articulate Storyline
C. Spreadsheet software
D. Basic presentation tools
Explanation: Authoring tools like Adobe Captivate and Articulate Storyline are specifically designed for creating interactive and multimedia-rich educational content, enabling the development of engaging and dynamic learning materials.
#23. Question 23: What is the primary goal of using adaptive learning platforms i education?
□ A. To standardize the learning experience for all students
B. To provide a personalized learning experience by adjusting content based on individual student needs
C. To eliminate the need for teacher intervention
D. To focus solely on group learning
Explanation: Adaptive learning platforms aim to provide a personalized learning experience by dynamically adjusting the content and difficulty based on each student's progress and understanding, thereby catering to individual learning needs.
#24. Question 24: How do interactive simulations benefit students in STEM education?
□ A. By replacing all laboratory work
□ B. By allowing students to experiment with virtual models and scenarios, enhancing understanding of complex concepts □
C. By focusing only on theoretical knowledge $\hfill\Box$
D. By limiting student interaction
Explanation: Interactive simulations allow students in STEM education to experiment with virtual models and scenarios which enhances their understanding of complex concepts through hands-on, experiential learning without the constraint

of physical laboratories.

[©] Ayurvite Wellness Pvt Ltd. All rights reserved. This PDF is for personal use only Unauthorized reproduction, distribution, or commercial use is strictly prohibited.

#25. Question 25: What is the advantage of using e-portfolios in education?
□ A. They replace traditional grading systems
B. They provide a comprehensive and organized collection of a student's work and achievements
C. They limit student creativity
D. They focus solely on final exams
Explanation: E-portfolios offer a comprehensive and organized collection of a student's work, achievements, reflections, and progress over time, allowing for a holistic assessment of their learning and development.
#26. Question 26: Which of the following technologies is essential for enabling distance learning?
A. Overhead projectors
B. Internet connectivity and online platforms
C. Printed textbooks
□ D. Physical classroom spaces
Explanation: Internet connectivity and online platforms are essential for enabling distance learning, as they facilitate the delivery of course content, communication, and interaction between students and educators remotely.
#27. Question 27: How does Virtual Reality (VR) differ from Augmented Reality (AR) in educational contexts?
A VP condens digital information and the value and while AP anatom a sample to be sixted as size and at
A. VR overlays digital information onto the real world, while AR creates a completely virtual environment
B. VR creates a completely virtual environment, while AR overlays digital information onto the real world
C. VR and AR are identical technologies
D. VR is used only for entertainment
Explanation: Virtual Reality (VR) creates a completely immersive virtual environment, while Augmented Reality (AR) overlays digital information onto the real world, enhancing real-world experiences with additional digital content.
#28. Question 28: What is the role of mobile learning (m-learning) in modern education?
□ A. To restrict learning to desktop computers □
B. To provide flexibility by allowing students to access learning materials and activities on mobile devices
C. To replace all traditional learning methods
D. To limit student access to educational resources

Explanation: Mobile learning (m-learning) provides flexibility by enabling students to access learning materials, participate in activities, and engage with educational content on mobile devices such as smartphones and tablets, facilitating learning anytime and anywhere.

[©] Ayurvite Wellness Pvt Ltd. All rights reserved. This PDF is for personal use only. Unauthorized reproduction, distribution, or commercial use is strictly prohibited.

#29. Question 29: Which of the following is an example of a synchronous online learning tool?

T001?
□ A. Pre-recorded video lectures
□ B. Discussion forums
C. Live video conferencing sessions
D. Email exchanges
Explanation: Live video conferencing sessions are an example of synchronous online learning tools, as they allow real-time interaction between instructors and students, mimicking the immediacy of traditional classroom settings.
#30. Question 30: How do educational technologies support differentiated instruction?
□ A. By enforcing a single teaching method □
\Box B. By providing diverse tools and resources that cater to varied learning styles and abilities \Box
C. By limiting student choices
D. By focusing only on standardized assessments
Explanation: Educational technologies support differentiated instruction by offering a variety of tools and resources, such as multimedia content, adaptive learning platforms, and interactive activities, which cater to the diverse learning styles and abilities of students, enabling personalized and effective teaching strategies.
#31. Question 31: What is the primary difference between the internet and an intranet?
□ A. The internet is a private network, while an intranet is public
□ B. The internet is accessible globally, whereas an intranet is restricted to an organization
□ C. The intranet uses different protocols than the internet □
D. The intranet is used for entertainment purposes only
Explanation: The internet is a global public network accessible to anyone with an internet connection, whereas an intrane is a private network accessible only to members of a specific organization, providing internal communication and resources.
#32. Question 32: Which of the following best describes the role of email in educationa institutions?
☐ A. It is used exclusively for administrative announcements
B. It serves as a primary communication tool between teachers and students
C. It replaces all other forms of communication
D. It is rarely used in modern education
Explanation: Email serves as a primary communication tool in educational institutions, facilitating correspondence

© Ayurvite Wellness Pvt Ltd. All rights reserved. This PDF is for personal use only Unauthorized reproduction, distribution, or commercial use is strictly prohibited.

between teachers and students, sharing resources, and coordinating activities.

#33. Question 33: What advantage does video conferencing offer in higher education?
□ A. It eliminates the need for physical classrooms
□ B. It allows real-time interaction between remote participants
□ C. It reduces the quality of education
□ D. It limits student participation
Explanation: Video conferencing allows real-time interaction between remote participants, enabling live lectures, discussions, and collaborations regardless of geographical locations, thereby enhancing the accessibility and flexibility of education.
#34. Question 34: Which method of teaching is characterized by the teacher being the central figure who directs all learning activities?
□ A. Learner-centered methods
□ B. Collaborative learning
□ C. Teacher-centered methods
□ D. Flipped classroom
Explanation: Teacher-centered methods place the teacher as the central figure who directs all learning activities, controls the flow of information, and makes all key decisions in the educational process.
#35. Question 35: What is a key feature of learner-centered teaching methods?
□ A. The teacher solely delivers information
B. Students actively participate and take responsibility for their learning
C. Learning occurs passively
D. The curriculum is fixed and unchangeable
Explanation: Learner-centered teaching methods emphasize active student participation, responsibility for their own learning, and the development of critical thinking and problem-solving skills.
#36. Question 36: Which of the following platforms is an example of a Massive Open Online Course (MOOC)?
A Blackboard
A. Blackboard □ □ □
B. Coursera
C. Microsoft Teams □ D. Zoom

Explanation: Coursera is an example of a Massive Open Online Course (MOOC) platform, offering a wide range of courses to a large number of participants globally, often for free or at a low cost.

[©] Ayurvite Wellness Pvt Ltd. All rights reserved. This PDF is for personal use only. Unauthorized reproduction, distribution, or commercial use is strictly prohibited.

#37. Question 37: How do platforms like Swayam and Swayamprabha contribute to higher education in India?

education in India?
☐ A. By providing exclusive courses to select institutions
B. By offering free online courses and educational resources to a broad audience
C. By replacing traditional universities
D. By focusing solely on technical education
Explanation: Swayam and Swayamprabha provide free online courses and educational resources to a wide audience enhancing access to quality education across India and supporting lifelong learning initiatives.
#38. Question 38: What is the main goal of integrating Information and Communication Technologies (ICT) in teaching?
A. To automate the teaching process
B. To enhance the learning experience and improve educational outcomes
C. To replace teachers with technology
D. To limit student interaction
Explanation: The main goal of integrating ICT in teaching is to enhance the learning experience by making it more interactive, engaging, and effective, thereby improving educational outcomes for students.
#39. Question 39: Which teaching support system is considered traditional?
□ A. Interactive whiteboards
B. Printed textbooks
C. Online learning platforms
D. Learning Management Systems (LMS)
Explanation: Printed textbooks are considered a traditional teaching support system, providing static content that ha been used in education for centuries.
#40. Question 40: What distinguishes modern teaching support systems from traditional
ones?
□ A. They rely solely on printed materials
B. They incorporate digital tools and technologies to facilitate learning
C. They eliminate the need for teacher interaction
D. They focus only on rote memorization
Explanation: Modern teaching support systems incorporate digital tools and technologies, such as interactive software

online resources, and multimedia content, to facilitate and enhance the learning process beyond traditional methods.

[©] Ayurvite Wellness Pvt Ltd. All rights reserved. This PDF is for personal use only. Unauthorized reproduction, distribution, or commercial use is strictly prohibited.

#41 Occasion 41 Which of the following is an ICT be and be obtained and analysis
#41. Question 41: Which of the following is an ICT-based teaching support system?
□ A. Chalkboards □
□. Overhead projectors
C. Learning Management Systems (LMS) like Moodle
D. Printed handouts
Explanation: Learning Management Systems (LMS) like Moodle are ICT-based teaching support systems that provide a platform for managing course content, assessments, and student interactions digitally.
#42. Question 42: How does the use of intranets benefit educational institutions?
A. By providing unrestricted access to all internet resources
B. By facilitating internal communication and resource sharing among staff and students
C. By replacing the need for email
D. By limiting access to educational materials
Explanation: Intranets facilitate internal communication and resource sharing among staff and students within an educational institution, enhancing collaboration and access to proprietary resources.
#43. Question 43: What is a significant advantage of using audio conferencing in education?
A. It allows for visual presentations
B. It enables communication without the need for video, saving bandwidth
C. It requires high-speed internet
D. It limits the number of participants
Explanation: Audio conferencing enables real-time communication without the need for video, which can save bandwidth and make it easier for participants with limited internet resources to join discussions and lectures.
#44 Question 44. Which topoling mothed is most plianed with the principles of blander
#44. Question 44: Which teaching method is most aligned with the principles of blended learning?
A. Only online courses □
□. Only face-to-face lectures □
C. A combination of online digital media and traditional classroom methods
D. Self-paced learning without any instructor interaction
Explanation: Blended learning combines online digital media and traditional classroom methods, offering a flexible and integrated approach to education that leverages the benefits of both modalities.

#45. Question 45: How do MOOCs support lifelong learning?

A. By requiring students to enroll in full-time programs

[©] Ayurvite Wellness Pvt Ltd. All rights reserved. This PDF is for personal use only Unauthorized reproduction, distribution, or commercial use is strictly prohibited.

B. By providing flexible, accessible courses that individuals can take at any stage of their lives
C. By limiting course offerings to undergraduate studies
D. By focusing solely on technical skills
Explanation: MOOCs support lifelong learning by offering flexible and accessible courses that individuals can take at any stage of their lives, allowing them to continuously update their knowledge and skills without the constraints of traditional education systems.
#46. Question 46: What is a key characteristic of teacher-centered teaching methods?
A. Emphasis on student collaboration
B. Teacher as the primary source of knowledge and authority
C. Focus on student-led discovery
D. Use of technology to facilitate learning
Explanation: Teacher-centered teaching methods emphasize the teacher as the primary source of knowledge and authority, directing the learning process and delivering information to students in a more passive learning environment.
#47. Question 47: Which of the following best defines learner-centered teaching methods?
A. Teacher lectures without student interaction
B. Students actively engage in the learning process through activities and collaboration
C. Learning is strictly guided by the teacher
D. Use of only traditional teaching tools
Explanation: Learner-centered teaching methods focus on active student engagement, encouraging participation, collaboration, and activities that promote deeper understanding and critical thinking.
#48. Question 48: What is the primary purpose of teaching support systems in higher
education?
□ A. To replace the role of teachers
□ B. To enhance and facilitate the teaching and learning process
□ C. To limit student access to resources
□ D. To standardize all teaching methods
Explanation: Teaching support systems are designed to enhance and facilitate the teaching and learning process by providing tools, resources, and technologies that support both instructors and students in achieving educational objectives.
#49. Question 49: How do online platforms like Swayam differ from traditional classroom settings?
□ A. They require physical attendance

© Ayurvite Wellness Pvt Ltd. All rights reserved. This PDF is for personal use only Unauthorized reproduction, distribution,

or commercial use is strictly prohibited.

PDF generated on 19 Nov 2025, 08:42 am IST

□ B. They offer flexible access to course materials and allow for self-paced learning
C. They eliminate the need for any assessments
D. They focus solely on in-person interactions
Explanation: Online platforms like Swayam offer flexible access to course materials, allowing students to learn at their own pace and convenience, unlike traditional classroom settings that require physical attendance and adhere to a fixed schedule.
#50. Question 50: What is the role of MOOCs in democratizing education?
A. By restricting access to exclusive institutions
B. By providing free or affordable access to high-quality education to anyone with an internet connection
C. By focusing only on elite students
D. By replacing traditional degrees
Explanation: MOOCs democratize education by making high-quality courses from reputable institutions available to anyone with an internet connection, regardless of their geographical location or financial status, thereby promoting equal access to education.
#51. Question 51: What is a primary function of email in the context of ICT in education?
A. To conduct live lectures
B. To facilitate asynchronous communication between teachers and students
C. To replace all forms of digital communication
D. To host virtual classrooms
Explanation: Email facilitates asynchronous communication between teachers and students, allowing them to exchange messages, share resources, and provide feedback without requiring simultaneous online presence.
#52. Question 52: How does audio conferencing benefit large-scale educational institutions?
A. It reduces the need for internet connectivity
B. It allows for cost-effective communication with numerous participants simultaneously
C. It limits communication to small groups
□ D. It eliminates the need for in-person meetings
Explanation: Audio conferencing allows large-scale educational institutions to communicate with numerous participants simultaneously in a cost-effective manner, supporting lectures, seminars, and collaborative discussions without the need for physical presence.
#53. Question 53: Which of the following is an example of a modern teaching support system?
□ A. Overhead projectors

© Ayurvite Wellness Pvt Ltd. All rights reserved. This PDF is for personal use only. Unauthorized reproduction, distribution,

or commercial use is strictly prohibited.

□ B. Interactive whiteboards □ C. Chalkboards □ D. Printed syllabi
Explanation: Interactive whiteboards are a modern teaching support system that enables dynamic and interactive presentations, enhancing the teaching and learning experience through multimedia integration and real-time collaboration.
#54. Question 54: What distinguishes online teaching methods from offline methods in higher education?
A. Online methods require physical presence
B. Offline methods use digital tools exclusively
C. Online methods utilize digital platforms to deliver content and facilitate interaction
D. Offline methods incorporate virtual simulations
Explanation: Online teaching methods utilize digital platforms and tools to deliver content, facilitate interaction, and manage learning activities, whereas offline methods rely on traditional face-to-face interactions and physical resources.
#55. Question 55: How do teaching support systems based on ICT improve the efficiency of higher education institutions?
□ A. By increasing administrative workload
B. By automating routine tasks and providing easy access to resources
C. By limiting student access to information
D. By replacing teachers with technology
Explanation: ICT-based teaching support systems improve efficiency by automating routine administrative tasks, providing easy access to educational resources, and facilitating streamlined communication and management processes within higher education institutions.
#56. Question 56: What is a key benefit of using video conferencing for collaborative projects in higher education?
□ A. It replaces the need for physical collaboration
B. It allows students from different locations to work together in real-time
☐ C. It limits the scope of collaborative projects
D. It reduces the quality of interactions
Explanation: Video conferencing enables students from different geographical locations to collaborate in real-time.
Explanation. Made conferencing enables students from different geographical locations to collaborate in real-time,

© Ayurvite Wellness Pvt Ltd. All rights reserved. This PDF is for personal use only Unauthorized reproduction, distribution, or commercial use is strictly prohibited.

enhancing teamwork and allowing for diverse perspectives in collaborative projects.

#57. Question 57: How do learner-centered methods utilize ICT to enhance student learning?
☐ A. By enforcing strict teacher control over all activities
B. By providing interactive and personalized learning tools that cater to individual student needs
C. By replacing all face-to-face interactions
□ D. By focusing solely on lecture-based content delivery
Explanation: Learner-centered methods use ICT to provide interactive and personalized learning tools, such as adaptive learning platforms and interactive simulations, which cater to individual student needs and promote active engagement in the learning process.
#58. Question 58: What is the role of platforms like Swayamprabha in ICT-based teaching support systems?
A. To host only paid courses
B. To provide free educational content through television and online platforms
C. To limit access to exclusive content
D. To replace traditional classrooms entirely
Explanation: Platforms like Swayamprabha provide free educational content through television broadcasts and online platforms, supporting ICT-based teaching by making educational resources widely accessible to a diverse audience.
#59. Question 59: Which teaching support system is considered traditional?
A. E-learning platforms B. Printed textbooks and chalkboards C. Interactive whiteboards D. Learning Management Systems (LMS)
Explanation: Printed textbooks and chalkboards are considered traditional teaching support systems, relying on physica materials and non-digital tools to facilitate the educational process.
#60. Question 60: How do MOOCs differ from traditional online courses offered by universities? A. MOOCs are typically free and open to anyone, whereas traditional online courses may require enrollment and fees B. MOOCs require physical attendance C. Traditional online courses do not offer any form of certification

© Ayurvite Wellness Pvt Ltd. All rights reserved. This PDF is for personal use only Unauthorized reproduction, distribution, or commercial use is strictly prohibited.

Explanation: MOOCs (Massive Open Online Courses) are typically free and open to anyone with internet access, allowing a large number of participants, whereas traditional online courses offered by universities may require formal enrollment,

D. MOOCs are only available to university students

tuition fees, and are usually limited to university students.

#61. Question 61: What is the primary function of e-mail in ICT-based teaching support systems?

systems:	
□ A. To deliver real-time lectures	
B. To facilitate asynchronous communication and information exchange between teachers and students	
C. To host online discussions	
D. To replace all other forms of communication	
Explanation: E-mail facilitates asynchronous communication and information exchange between teachers and studen allowing for the sharing of resources, feedback, and coordination without requiring simultaneous online presence.	ıts
#62. Question 62: How do platforms like Swayam support governance in higher education?	
A. By centralizing administrative control over courses	
B. By providing standardized and quality-assured online courses accessible to all	
C. By restricting access to only certain students	
D. By focusing solely on technical education	
Explanation: Platforms like Swayam support governance in higher education by offering standardized and quality-assuronline courses that are accessible to all students, promoting equitable access to education and maintaining education standards.	
#63. Question 63: What is a key advantage of using audio conferencing in higher education	1?
A. It allows for visual presentations	
B. It enables voice-only communication, which can be less bandwidth-intensive than video	
C. It restricts communication to small groups	
D. It replaces the need for any digital tools	
Explanation: Audio conferencing enables voice-only communication, which can be less bandwidth-intensive than vide conferencing, making it a cost-effective and accessible option for real-time communication in higher education.	led
#64. Question 64: Which of the following best describes a teacher-centered teachin support system?	ng
A. Interactive online platforms that encourage student collaboration	
B. Traditional lecture halls with fixed seating and a single instructor	
□ C. Peer-to-peer learning networks	
D. Student-led discussion forums	
D. Stadent ica discussion fordins	
Explanation: Teacher-centered teaching support systems are characterized by traditional lecture halls where the instruction	L.

© Ayurvite Wellness Pvt Ltd. All rights reserved. This PDF is for personal use only Unauthorized reproduction, distribution, or commercial use is strictly prohibited.

#65. Question 65: How do online platforms like MOOCs contribute to educational equity?

□ A. By limiting access to premium content
□ B. By providing free or affordable access to high-quality education to a global audience
□ C. By focusing only on elite institutions
□ D. By requiring expensive subscriptions
Explanation: MOOCs contribute to educational equity by offering free or affordable access to high-quality courses from reputable institutions to a global audience, thereby reducing barriers to education and promoting inclusive learning opportunities.
#66. Question 66: What is a significant challenge of implementing learner-centered methods using ICT?
□ A. Lack of available technology
B. Ensuring all students have access to necessary digital tools and resources
C. Over-reliance on teacher-led instruction
D. Reducing student autonomy
Explanation: A significant challenge of implementing learner-centered methods using ICT is ensuring that all students have access to the necessary digital tools and resources, as disparities in access can hinder the effectiveness and inclusivity of the learning process.
#67. Question 67: Which of the following is an ICT-based modern teaching support system?
A. Chalkboards
B. Printed syllabi
C. Virtual Learning Environments (VLEs) like Canvas and Blackboard

Explanation: Virtual Learning Environments (VLEs) like Canvas and Blackboard are ICT-based modern teaching support systems that provide comprehensive platforms for course management, content delivery, assessments, and student-teacher interactions.

#68. Question 68: How do Information and Communication Technologies (ICT) enhance teacher-centered teaching methods?

A. By making the classroom more passive
B. By providing teachers with tools to deliver content more effectively and engage students \Box
C. By reducing the teacher's role in the classroom
D. By eliminating the need for instructional materials

Explanation: ICT enhances teacher-centered teaching methods by providing teachers with advanced tools and resources to deliver content more effectively, engage students through multimedia presentations, and manage classroom activities

D. Overhead projectors

[©] Ayurvite Wellness Pvt Ltd. All rights reserved. This PDF is for personal use only. Unauthorized reproduction, distribution, or commercial use is strictly prohibited.

efficiently.

#69. Question 69: What is the primary difference between offline and online teaching methods?

□ A. Offline methods use digital platforms, while online methods do not
B. Online methods rely on digital platforms and internet connectivity, whereas offline methods rely on physical present and traditional resources
C. Offline methods are more flexible than online methods
□ D. Online methods eliminate the need for any instructional materials
Explanation: Online teaching methods rely on digital platforms and internet connectivity to deliver content and facilita learning, whereas offline methods depend on physical presence, traditional resources, and face-to-face interactions finstruction.
#70. Question 70: How do teaching support systems based on ICT facilitate learne autonomy?
A. By providing rigid learning paths
B. By offering personalized learning resources and tools that allow students to control their own learning pace and style \Box
C. By limiting access to information □
D. By focusing solely on teacher-led instruction
Explanation: ICT-based teaching support systems facilitate learner autonomy by offering personalized learning resource and tools that enable students to control their own learning pace, style, and pathways, thereby promoting independe and self-directed learning.
#71. Question 71: Which of the following best describes Swayamprabha?
□ A. A traditional classroom tool
\square B. An educational television channel providing free courses and lectures
□ C. A type of interactive whiteboard
□ D. An online forum for student discussions
Explanation: Swayamprabha is an educational television channel in India that provides free courses and lecture complementing online platforms and enhancing access to education through broadcast media.
#72. Question 72: What is the main advantage of using MOOCs for professionadevelopment?
□ A. They require full-time enrollment
⊔ B. They offer flexible schedules and access to a wide range of specialized courses □
C. They are only available to undergraduate students
D. They focus solely on theoretical knowledge

© Ayurvite Wellness Pvt Ltd. All rights reserved. This PDF is for personal use only. Unauthorized reproduction, distribution, or commercial use is strictly prohibited.

Explanation: MOOCs offer flexible schedules and access to a wide range of specialized courses, making them ideal for professionals seeking to update their skills, gain new knowledge, or pursue continuous education without the constraints of traditional programs.

#73. Question 73: How do traditional teaching support systems differ from modern ICT-based systems?

□ A. Traditional systems use digital tools, while modern systems do not
□ B. Traditional systems rely on physical resources and face-to-face interactions, whereas modern ICT-based systems utilize digital technologies and online platforms
C. Modern systems eliminate the need for teachers
□ D. Traditional systems are more interactive than modern systems
Explanation: Traditional teaching support systems rely on physical resources such as textbooks and face-to-face interactions, while modern ICT-based systems utilize digital technologies, online platforms, and interactive tools to support teaching and learning processes.
#74. Question 74: What is the role of e-mail in supporting online teaching methods?
□ A. To host virtual classrooms
□ B. To facilitate direct and asynchronous communication between instructors and students
C. To deliver real-time lectures
□ D. To replace all other communication tools
Explanation: E-mail facilitates direct and asynchronous communication between instructors and students in online teaching methods, allowing for the exchange of messages, feedback, and resources without requiring simultaneous online presence.
#75. Question 75: Which of the following is a characteristic of teacher-centered methods in
the context of ICT?
A. Students lead the learning process
B. Teachers use ICT tools to present information and manage the classroom
C. Learning is primarily student-driven
D. ICT is used to facilitate peer collaboration
Explanation: In teacher-centered methods, ICT tools are used by teachers to present information, manage classroom activities, and deliver content in a structured and authoritative manner, maintaining the teacher's central role in the learning process.
#76. Question 76: How do platforms like Swayam support governance in higher education?
□ A. By allowing universities to bypass accreditation
\Box B. By providing a standardized and regulated platform for delivering online courses \Box

[©] Ayurvite Wellness Pvt Ltd. All rights reserved. This PDF is for personal use only. Unauthorized reproduction, distribution, or commercial use is strictly prohibited.

C. By limiting course offerings to specific subjects
D. By focusing only on international students
Explanation: Platforms like Swayam support governance in higher education by providing a standardized and regulated platform for delivering online courses, ensuring quality and consistency across educational offerings and aligning with national educational standards.
#77. Question 77: What is a key feature of learner-centered methods supported by ICT?
□ A. Passive reception of information □
B. Interactive and personalized learning experiences
C. Teacher-only control over learning activities
D. Limited use of digital resources
Explanation: Learner-centered methods supported by ICT focus on interactive and personalized learning experiences allowing students to engage actively with content, collaborate with peers, and tailor their learning paths according to their individual needs and preferences.
#78. Question 78: Which of the following best describes the use of audio conferencing in higher education?
A. It replaces all face-to-face interactions
B. It facilitates voice-based communication for lectures, discussions, and meetings
C. It limits the number of participants to one
D. It is used solely for administrative purposes
Explanation: Audio conferencing facilitates voice-based communication for lectures, discussions, and meetings, enabling real-time interaction between instructors and students without the need for visual presence, thereby supporting flexible and remote learning environments.
#79. Question 79: How do Teaching Support Systems based on ICT enhance traditional teaching methods?
A. By making traditional methods obsolete
B. By integrating digital tools to complement and enhance traditional teaching practices
C. By eliminating the need for textbooks
D. By reducing teacher-student interaction
Explanation: Teaching Support Systems based on ICT enhance traditional teaching methods by integrating digital tools and resources, such as interactive presentations, online assessments, and digital collaboration platforms, thereb complementing and enriching traditional teaching practices.

#80. Question 80: What is the main benefit of using video conferencing for guest lectures in

higher education?

A. It reduces the need for student attendance
B. It allows institutions to host experts and guest speakers from around the world without geographical constraints
L C. It limits the interaction between students and guest lecturers
D. It eliminates the need for recording lectures
Explanation: Video conferencing allows educational institutions to host experts and guest speakers from around the world without geographical constraints, enriching the learning experience by providing access to diverse perspectives and specialized knowledge.
#81. Question 81: Which of the following best defines a teacher-centered teaching support system enhanced by ICT?
A. An online forum where students lead discussions
B. A digital presentation tool that allows teachers to deliver lectures more effectively
C. A peer-to-peer learning network
D. A collaborative online workspace for students
Explanation: A teacher-centered teaching support system enhanced by ICT, such as a digital presentation tool, allows teachers to deliver lectures more effectively by incorporating multimedia elements, interactive content, and organized information delivery, maintaining the teacher's central role in the classroom.
#82. Question 82: How do platforms like Swayamprabha contribute to distance learning?
A. By requiring students to attend physical sessions
B. By broadcasting educational content that students can access remotely
C. By limiting course availability to specific regions
D. By replacing online platforms
Explanation: Platforms like Swayamprabha contribute to distance learning by broadcasting educational content that students can access remotely, thereby supporting flexible and accessible learning opportunities for a wide audience.
#83. Question 83: What is the role of MOOCs in facilitating global education?
□ A. They restrict courses to local institutions
B. They enable learners from around the world to access courses from prestigious universities
C. They require learners to relocate to participate
D. They focus only on technical subjects
Explanation: MOOCs facilitate global education by enabling learners from around the world to access courses from prestigious universities and institutions, promoting international collaboration, knowledge sharing, and inclusive

#84. Question 84: How does the use of e-mail support asynchronous learning in higher

© Ayurvite Wellness Pvt Ltd. All rights reserved. This PDF is for personal use only Unauthorized reproduction, distribution, or commercial use is strictly prohibited.

education.

education?
□ A. By requiring real-time communication □
B. By allowing students and teachers to communicate at different times, accommodating varying schedules \Box
C. By replacing all synchronous communication tools
D. By limiting the ability to share resources
Explanation: E-mail supports asynchronous learning by allowing students and teachers to communicate at different times accommodating varying schedules and time zones, and providing flexibility in interactions and resource sharing.
#85. Question 85: What is a key characteristic of ICT-based learner-centered teaching methods?
A. Passive learning through lectures
B. Active engagement through interactive tools and collaborative platforms
C. Teacher-led instruction without student input
D. Reliance on printed materials only
Explanation: ICT-based learner-centered teaching methods emphasize active engagement through interactive tools collaborative platforms, and personalized learning experiences, fostering a more dynamic and student-driven learning environment.
#86. Question 86: How do Teaching Support Systems based on ICT facilitate blended learning?
A Divining all face to face internal land
A. By replacing all face-to-face interactions
\Box B. By integrating online digital media with traditional classroom methods to create a hybrid learning environment \Box
□ B. By integrating online digital media with traditional classroom methods to create a hybrid learning environment □ C. By limiting course offerings to online-only □
\Box B. By integrating online digital media with traditional classroom methods to create a hybrid learning environment \Box
□ B. By integrating online digital media with traditional classroom methods to create a hybrid learning environment □ C. By limiting course offerings to online-only □
B. By integrating online digital media with traditional classroom methods to create a hybrid learning environment C. By limiting course offerings to online-only D. By focusing solely on independent study Explanation: Teaching Support Systems based on ICT facilitate blended learning by integrating online digital media with traditional classroom methods, creating a hybrid learning environment that leverages the strengths of both approaches for
B. By integrating online digital media with traditional classroom methods to create a hybrid learning environment C. By limiting course offerings to online-only D. By focusing solely on independent study Explanation: Teaching Support Systems based on ICT facilitate blended learning by integrating online digital media with traditional classroom methods, creating a hybrid learning environment that leverages the strengths of both approaches for enhanced educational outcomes. #87. Question 87: Which of the following is an example of an offline teaching method supported by ICT?
B. By integrating online digital media with traditional classroom methods to create a hybrid learning environment C. By limiting course offerings to online-only D. By focusing solely on independent study Explanation: Teaching Support Systems based on ICT facilitate blended learning by integrating online digital media with traditional classroom methods, creating a hybrid learning environment that leverages the strengths of both approaches for enhanced educational outcomes. #87. Question 87: Which of the following is an example of an offline teaching method supported by ICT? A. Online quizzes
B. By integrating online digital media with traditional classroom methods to create a hybrid learning environment C. By limiting course offerings to online-only D. By focusing solely on independent study Explanation: Teaching Support Systems based on ICT facilitate blended learning by integrating online digital media with traditional classroom methods, creating a hybrid learning environment that leverages the strengths of both approaches for enhanced educational outcomes. #87. Question 87: Which of the following is an example of an offline teaching method supported by ICT? A. Online quizzes B. Interactive whiteboard lectures
B. By integrating online digital media with traditional classroom methods to create a hybrid learning environment C. By limiting course offerings to online-only D. By focusing solely on independent study Explanation: Teaching Support Systems based on ICT facilitate blended learning by integrating online digital media with traditional classroom methods, creating a hybrid learning environment that leverages the strengths of both approaches for enhanced educational outcomes. #87. Question 87: Which of the following is an example of an offline teaching method supported by ICT? A. Online quizzes

© Ayurvite Wellness Pvt Ltd. All rights reserved. This PDF is for personal use only Unauthorized reproduction, distribution, or commercial use is strictly prohibited.

through digital submission platforms or online grading systems, blending traditional and digital approaches.

#88. Question 88: What is the primary function of Audio and Video-Conferencing in higher education?

education?
A. To replace all traditional teaching methods
B. To facilitate real-time communication and interaction between remote participants
C. To limit the number of students in a class
D. To provide recorded lectures only
Explanation: Audio and Video-Conferencing facilitate real-time communication and interaction between remote participants, enabling live lectures, discussions, and collaborations regardless of geographical locations.
#89. Question 89: How do Teaching Support Systems enhance learner-centered methods in higher education?
A. By enforcing a single learning path for all students
B. By providing tools that allow for personalized and interactive learning experiences
C. By reducing the use of digital resources
D. By focusing solely on teacher-led instruction
Explanation: Teaching Support Systems enhance learner-centered methods by providing tools such as adaptive learning platforms, interactive simulations, and collaborative online spaces that allow for personalized and interactive learning experiences tailored to individual student needs.
#90. Question 90: What is a primary advantage of using interactive whiteboards in the classroom?
□ A. They eliminate the need for traditional teaching methods
B. They enable dynamic and interactive presentations that engage students
□ C. They are less versatile than traditional whiteboards
□ D. They focus solely on text-based information
Explanation: Interactive whiteboards enable dynamic and interactive presentations by incorporating multimedia elements, interactive activities, and real-time collaboration, thereby increasing student engagement and enhancing the learning experience.
#91. Question 91: Which of the following best describes learner autonomy in the context of ICT-based teaching support systems?
□ A. Complete reliance on teacher instructions
B. The ability of students to control their own learning processes using digital tools
C. Limited access to learning resources
c. Elittled decess to learning resources
D. Standardized learning paths for all students

© Ayurvite Wellness Pvt Ltd. All rights reserved. This PDF is for personal use only Unauthorized reproduction, distribution, or commercial use is strictly prohibited.

about what, when, and how to learn, often facilitated by ICT-based teaching support systems that provide access to diverse resources and tools.

#92. Question 92: How do platforms like Swayam integrate with traditional higher education systems?

systems?
□ A. By replacing traditional curricula
B. By offering supplementary online courses that complement traditional in-person education
C. By limiting course offerings to non-academic subjects
D. By focusing solely on vocational training
Explanation: Platforms like Swayam integrate with traditional higher education systems by offering supplementary online courses that complement traditional in-person education, providing additional learning opportunities and resources for students.
#93. Question 93: What is the main benefit of using Learning Management Systems (LMS) in higher education?
☐ A. They replace the need for physical classrooms
Light Distribution B. They provide a centralized platform for managing course content, assessments, and student interactions
C. They limit student access to educational resources
D. They focus solely on administrative tasks
Explanation: Learning Management Systems (LMS) provide a centralized platform for managing course content assessments, and student interactions, streamlining the educational process and enhancing both teaching and learning experiences through organized and accessible digital resources.
#94. Question 94: How do Teaching Support Systems based on ICT promote inclusivity in
higher education?
A. By limiting access to certain student groups
B. By providing diverse tools and resources that cater to different learning needs and styles
C. By focusing only on high-achieving students
D. By replacing all traditional teaching methods
Explanation: Teaching Support Systems based on ICT promote inclusivity by offering diverse tools and resources, such as adaptive learning technologies, multimedia content, and accessible platforms, that cater to different learning needs and styles, ensuring that all students have the opportunity to succeed.
#95. Question 95: What role does e-mail play in supporting blended learning environments?
A. It replaces all face-to-face interactions
B. It serves as a tool for communication and resource sharing between students and instructors
C. It limits student access to learning materials

[©] Ayurvite Wellness Pvt Ltd. All rights reserved. This PDF is for personal use only. Unauthorized reproduction, distribution, or commercial use is strictly prohibited.

□ D. It is used solely for administrative purposes
Explanation: E-mail serves as a tool for communication and resource sharing in blended learning environments, facilitating interactions between students and instructors, distributing course materials, and providing feedback outside of face-to-face sessions.
#96. Question 96: How do modern Teaching Support Systems leverage ICT to facilitate collaborative learning?
A. By isolating students during learning activities
B. By providing online platforms and tools that enable real-time collaboration and communication among students
C. By focusing solely on individual assignments
D. By limiting access to group resources
Explanation: Modern Teaching Support Systems leverage ICT by providing online platforms and tools, such as collaborative document editors, discussion forums, and virtual meeting spaces, that enable real-time collaboration and communication among students, fostering a collaborative learning environment.
#97. Question 97: Which of the following is an example of an offline teaching method enhanced by ICT?
A. Virtual reality simulations
B. Printed lecture notes supplemented with online resources
C. Live video conferencing
D. Online discussion boards
Explanation: Printed lecture notes supplemented with online resources represent an offline teaching method enhanced by ICT, combining traditional materials with digital resources to provide a richer and more flexible learning experience.
#98. Question 98: What is the primary function of audio conferencing in the context of ICT in education?
A. To provide visual presentations
\square B. To facilitate voice-based communication for lectures, meetings, and discussions
□ C. To replace all forms of digital communication
□ D. To limit the number of participants
Explanation: Audio conferencing facilitates voice-based communication for lectures, meetings, and discussions, enabling real-time interaction between instructors and students without the need for visual components, which can be particularly useful in situations with limited bandwidth or when video is not necessary.
#99. Question 99: How do ICT-based Teaching Support Systems aid in the implementation of

© Ayurvite Wellness Pvt Ltd. All rights reserved. This PDF is for personal use only Unauthorized reproduction, distribution, or commercial use is strictly prohibited.

A. By enforcing a rigid curriculum

www.ayurvedbharati.org

B. By providing personalized learning pathways and interactive tools that cater to individual student needs	
C. By focusing solely on teacher-led instruction	
D. By limiting student access to resources	

Explanation: ICT-based Teaching Support Systems aid in implementing learner-centered methods by offering personalized learning pathways, interactive tools, and resources that cater to individual student needs, promoting active engagement and self-directed learning.

#100. Question 100: What is a key advantage of using video conferencing for guest lectures in higher education?

□ A. It restricts the number of guest lecturers □ B. It allows institutions to host experts from around the world without geographical limitations □ C. It makes scheduling more difficult □ D. It eliminates the need for in-person lectures

Explanation: Video conferencing allows educational institutions to host guest lecturers and experts from around the world without geographical limitations, enriching the curriculum with diverse perspectives and specialized knowledge that might otherwise be inaccessible.
